Improving outcomes for patients with pancreatic cancer (PC) is desperately needed, with patients diagnosed in the UK still having a poor prognosis. Currently the average life expectancy for a patient with PC is between 4 to 6 months and only 3% of patients survive beyond 5 years<sup>1</sup>.

This 5-part Pancreatic Cancer Webinar Series (PCWS) will focus on bridging the gap between the variation in care between secondary and tertiary sites, novel treatment strategies, chemotherapeutic agents and the fundamental importance of nutritional failure associated with pancreatic cancer.

The webinar series will provide an overview of the current best practice and is aimed at those clinicians and allied health professionals who treat patients with pancreatic cancer in primary, secondary and tertiary care.

# Pancreatic Cancer Webinar Series

## Webinar 1 details

**9th December 2020 | 12:30 – 13:40**

**The legacy of centralised pancreatic services in the UK: A Debate**

### **Learning objectives**

What has been the impact on pancreatic cancer outcomes since centralisation?

When should a patient be managed locally?

What does the future hold for centralisation of pancreatic cancer care?

*Prof Mark  
Taylor*

*Mr Keith  
Roberts*

*Prof Juan  
Valle*

*Dr Vikram  
Mitra*

*Vicki  
Stevenson-Hornby*

*Additional Speaker: Diane Dobson, Specialist Pancreatic Cancer Nurse*

## Future webinar dates and titles

**16th December 2020**

Missed opportunity? Treatment of Pancreatic  
Exocrine Insufficiency (PEI) across the UK:  
the RICOCHET national audit

**21st January 2021**

Optimal pathways for non-metastatic  
pancreatic cancer

**17th February 2021**

Non-surgical and emerging  
therapies in pancreatic cancer

**18th March 2021**

Novel strategies in  
pancreatic cancer
