A Strong History

Most graduates publish every year

- Conducting a scientific research project and publishing the results is a foundational part of the Pancreas 2000 program
- As of September 9, 2022, all 222 participants in Pancreas 2000 courses 1 through 9 published 4456 scientific papers related to the pancreas in peer-reviewed journals indexed in PubMed
- More than half published at least one paper per year, and 18 (8.1%) published regularly - five or more papers per year - since they initiated Pancreas 2000. Only 10 (4.5%) participants never published a single article related to the pancreas
